About me

Curious Full Stack Developer with 5+ years of experience building scalable, data-driven web applications. I enjoy challenges that push my technical vision further and leave a useful product in the hands of users. Looking to grow in teams using cutting-edge technologies.

Interests

I enjoy creating things with both hands and mind — drawing, woodworking, playing guitar, and building apps. Always picking up new skills that end with a finished product.

Experience

Full Stack Developer · [HMH Sistemas](#)

Jul 2021 – Present

- Developed 30+ reusable React components — data tables, dashboards, and maps — adopted across a 10+ person Scrum team, reducing duplicate code and accelerating feature delivery.
- Built and maintained RESTful APIs and backend services with clean architecture, unit tests, and CI/CD pipelines integrated into Git workflows.
- Optimized state management and API integrations, improving performance by 40% on data-heavy dashboard web applications.
- Translated Figma designs into responsive, production-ready user interfaces reducing manual steps for users.
- Integrated Firebase and AWS cloud services for database management, authentication, and infrastructure.
- Implemented secure user auth system with CRUD operations, session validation, and security best practices.
- Collaborated in Scrum-based delivery with sprint planning, code reviews, and cross-functional team coordination.

Tools: *TypeScript, JavaScript, Node.js, NestJS, React, Next.js, Jest, PostgreSQL, AWS*
